Table of Contents

1. Verification And Validation 4
2. Roles 4
3. Test Case And Result 4

1. Verification And Validation

This document was prepared to guarantee that this network security function requirement meets its verification and validation expected criteria.

2. Roles

Role	Name
Documentation Software Designer	`S. R. Lim`
Hazard Analysis Product Manager	`S. I. Choi`

3. Test Case And Result

Item	Action	Criteria	Result	Verdict
Enclosure #1	Configure device security measures	Ensure the system can protect core functions during a cybersecurity breach using device security features.		`PASS`
Enclosure #2	Automatic logoff	Ensure the system logs off automatically after designated minutes.		`PASS`
Enclosure #3	Run antivirus and anti-malware scans	Ensure no viruses or malware are detected.		`PASS`

Item	Action	Criteria	Result	Verdict
Enclosure #4	Configure Firewall and Network Protection	Ensure the manufacturer provides defined response actions for detecting cybersecurity threats and communicates relevant information to the end user.		PASS
Enclosure #5	Check operation log	Check the log for device status and every command such as register patient, create data, delete data, etc.	Verified	PASS
Enclosure #6	Integrity check during installation	After modifying the software installer, check the error message when running the installer.		PASS
Enclosure #7	PC unable to communicate with sensor unless Portview is installed	Prepare a P4 machine set and a PC without Portview. Connect the P4 machine set to the PC.	Nothing happened.	PASS
Enclosure #8	Verify software version	Ensure the correct version information is displayed.		PASS
Enclosure #9	Windows OS saves personal data with 256-bit AES-CBC encryption	Ensure personal data is protected when safety-sensitive data is saved or transported.	Personal Data Encryption (Microsoft Learn)	PASS

Item	Action	Criteria	Result	Verdict
Enclosure #10	Use checksum to validate data	Ensure threat control process for the confidentials against field message corruption or secured key corruption.		PASS
