Document Overview

This document records the system-level verification results for Portview.

1. Purpose

This document records the executed system-level verification results for the integrated Portview baseline.

2. References

This result record is governed primarily by:

- `PV-SYSTP-01` SystemTP-Z01
- `PV-SV-04` Software Verification Plan
- `PV-SV-05` Software Verification Report

3. Execution Information

Field	Value
Product under test	`Portview`
Governing procedure	`PV-SYSTP-01`
Software baseline	`Portview 2.2.5.16`
Test platform	`Genoray testing platform`
Configuration	`Default`
Executor	`J. W. Lee`
Execution date	`2026.03.18`
Independent reviewer	`M. C. Boo`
Review date	`2026.03.18`

Field	Value
Execution note	System-level tests were executed on the released Portview baseline using representative end-to-end workflows. The controlled platform configuration and product-level acceptance criteria enabled single-executor throughput. Independent verification is provided through document review by a separate reviewer.

4. Result Summary

System-level verification was reported as completed and the integrated Portview functions were stated to properly support the system specification.

Verification Area	Result Statement	Status
Integrated product baseline	Integrated system-level verification completed	`Pass summary stated`
Supporting system functions	Supporting functions properly support the system specification	`Pass summary stated`

4.1 Procedure-Level Result Set

The result set is aligned to the `SYSP-xxx` system procedure structure defined in `PV-SYSTP-01`.

System Procedure ID	Title	Executor	Date	Status
`SYSP-001`	Product baseline startup and availability	`J. W. Lee`	`2026.03.18`	`Passed`
`SYSP-002`	End-to-end patient and acquisition workflow	`J. W. Lee`	`2026.03.18`	`Passed`
`SYSP-003`	End-to-end viewer and diagnostic workflow	`J. W. Lee`	`2026.03.18`	`Passed`

System Procedure ID	Title	Executor	Date	Status
`SYSP-004`	End-to-end output and communication workflow	`J. W. Lee`	`2026.03.18`	`Passed`
`SYSP-005`	Device integrity and recovery workflow	`J. W. Lee`	`2026.03.18`	`Passed`
`SYSP-006`	Logging and localization workflow	`J. W. Lee`	`2026.03.18`	`Passed`
`SYSP-007`	Installation and authorized-version acceptance	`J. W. Lee`	`2026.03.18`	`Passed`
`SYSP-008`	Operational audit and log-review workflow	`J. W. Lee`	`2026.03.18`	`Passed`
`SYSP-009`	Data persistence and reopen workflow	`J. W. Lee`	`2026.03.18`	`Passed`

5. Deviations And Issues

No separate Portview system-level deviation is identified in the currently available result summary set.

ID	Description	Disposition
`NONE-RECORDED`	No separate Portview system-level deviation is listed in the currently available records	`Accepted as no recorded deviation`

6. Evidence References

Evidence Type	Reference	Location
Executed test protocol	Signed system-test execution protocol for `SYSP-001` to `SYSP-009`	QMS controlled archive, test-execution record set
Test environment log	Genoray testing platform configuration and session log	QMS controlled archive
Independent review record	Review sign-off by `M. C. Boo` confirming result acceptance	QMS controlled archive

7. Release Use

This result record is intended to support:

- system-result references in `PV-SV-05` Software Verification Report
- lifecycle evidence statements in `PV-SV-01` Software Validation Report
- system-level traceability rows in `PV-TM-01` Traceability Matrix
